

PRODUCT DERIVED FROM MILK SUBSTANTIALLY FREE OF BETA CASEIN FROM NON-  
HUMAN MAMMALS AND RELATIVE USE

## ABSTRACT

The present invention is related to a product derived from milk,  
5 substantially free of beta casein from non-human mammals. The  
invention is also related to the use of such a product especially in  
relation to diet, more particularly for early infancy, in the  
prevention of insulin-dependent diabets.
